

Future of Farming – Seeded Today

BARKLEY SEED
INCORPORATED

Water or No Water – Barkley Has You Covered

Water availability is a growing challenge for San Joaquin Valley growers. As restrictions, surcharges, and dry conditions impact crop decisions, Barkley offers a **solution for profitability with less water**: early maturing forage and hay cereals bred for efficiency and performance.

Low Water. High Return.

BSI's proprietary early-maturing cereals thrive in California's fall planting window and have been proven to produce **high-quality forage or hay with just two irrigations**, depending on rainfall and soil conditions.

PRONTO BARLEY

Early-Maturing, High-Quality Two-Row Forage Barley

- **Exceptional feed quality**: high protein, low lignin, high digestibility
- **Efficient use of water and fertility**

CASTAIC OATS

New and Improved Oat Genetics for California

- Early maturity with **yield and quality to match Montezuma Oats**
- Ideal companion crop for aging alfalfa fields
- **Optimized for low water input and fertility**

Plant Smart. Save Water. Stay Profitable.
